DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5, 7-10, and 11-13 allowed. The following is an examiner's statement of reasons for allowance:

In conventional radio communication system for transmitting signals via CDMA radio channels, a transmitter is configured to control the transmission power of signals. A first control method for controlling the transmission power of signals in each transmitter, so as to keep the received power of the signals in the receiver constant and a second control method for controlling the transmission power, so as to keep an SIR of the signals transmitted via each radio channel constant, are adopted as control methods of the transmission power of signals. However, the radio communication system adopting either the first and second control method have problems in that the wasted transmission of signals in a transmitter which is far away from the receiver, and which does not satisfy the predetermined power and required SIR, increases interference.

In viewing of the foregoing, it is an object of the present invention to provide a transmission power control method which enables the resolution of problems in the first and second control methods. A substantial search of the field of invention failed to provide any prior art of record that discloses, teaches, and/or fairly suggests "switching between a first control and a second control method based on the measured traffic volume in the base station; and transmitting a notification signal for notifying the measured traffic volume of the packet signals and the control method selected by the switching; and judging whether to transmit an acknowledgement signal indicating that a

Art Unit: 2416

received power of an access control signal received from the mobile station satisfies a predetermined condition" as specifically described in the independent claims of the instant application. Therefore, the claimed invention is patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

a) Niwano (US 20080037474), Mobile Station, Base Station, Communication System, and Communication Method

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FEBEN HAILE whose telephone number is (571)272-3072. The examiner can normally be reached on 10:00 am-6:30 pm.
